

PRESS RELEASE

LocoNav launches the All-New Report Builder

Aimed at simplifying fleet performance reporting to improve business decision-making and efficient fleet management

04 November 2022, New Delhi: LocoNav, world's fastest-growing AI-driven full-stack fleet tech company, today launched its all-new Report Builder as a part of its Fleet Management Solutions for its customers worldwide. As per a market research report (by Precedence Research), the global fleet management market size is predicted to be around USD 55 billion by 2030. Poor vehicle and driver performance can lead to the increased cost to business, hence it is critical to analyze the fleet data to optimally utilize the fleet and positively impact revenues.

The new Report Builder is all about giving more power to LocoNav customers. The Report Builder helps with categorising reports by choosing custom metrics relevant to the business, such as stoppage duration, idling, and overspeeding. With a variety of standard reports to pick from and the ability to build an unlimited number of custom reports, information on driving occurrences can be customised, downloaded, and scheduled daily, weekly, or monthly. This will help fleet managers with in-depth analysis of the performance of their drivers and vehicles. Here are some key benefits of the feature:

- Highly Customisable
 - Build custom reports from scratch or use pre-made report templates and view real-time data.
- Multiple Vehicle Support
 - Review performance data of multiple fleet vehicles at once with insightful analytical capabilities.
- Quick Sharing
 - Create and share custom reports with the team securely, at the click of a button.

LocoNav customers can get in touch with their LocoNav Key Account Manager to activate the Report Builder feature.
